PROFILE

Flutter Developer with over 3 years of experience building scalable cross-platform apps using Flutter, BLoC, and Firebase. Skilled in RESTful API integration, real-time features, offline caching, and responsive UI/UX design. Adept in Agile workflows, Git, and clean architecture, ensuring high-performance solutions. Actively seeking opportunities to innovate and contribute to dynamic teams.

EXPERIENCES

YAJ Tech Pvt. Ltd. | kathmandu — Mobile Application Developer (Flutter)

Jan 2023 -Mar 2025

- Developed real-time chat applications using Socket programming for seamless messaging and data synchronization.
- Managed complex application states with Flutter BLoC pattern, optimizing performance through state-based caching.
- Leveraged Dart Isolates to handle computationally intensive tasks, ensuring smooth UI performance.
- Optimized API calls using Dio and HTTP, implementing error handling and retry mechanisms for improved response times.
- Maintained clean, modular codebases using Dart mixins, services, extensions, constants, enums, and typedefs.
- Separated UI components from business logic to enhance code maintainability and scalability.
- Integrated Hive database for efficient offline storage, designing caching strategies to reduce load times.
- Implemented secure payment gateways (e-Sewa, Khalti, Connect-IPS) for reliable transaction processing.
- Built and optimized RESTful API requests with robust error handling and performance tuning.
- Facilitated Dart-to-Kotlin communication via platform channels to access native Android functionalities.
- Customized Kotlin plugins and manually upgraded Gradle versions to resolve build issues and enhance performance.

SKILLS

- Flutter & Dart
- State Management (Flutter_bloc, Provider)
- API Integration (Dio, HTTP)
- Real-Time Communication (Sockets)
- Cross-Platform Development
- Dependency Injection (get_it)
- Caching (Hive, Shared Preferences)
- Firebase
- Clean Architecture
- OOP(Object-Oriented Programming)
- Flavoring for Production & Development Environments
- Mobile App Security
- Push Notifications
- Offline Storage Techniques
- UI/UX Design (Figma)
- Responsive layouts
- Version Control (GitHub/GitLab)
- Project Migration (Gradle)
- Kotlin
- App Publishing (Play Store, App Store)
- Problem-Solving
- Continuous Improvement
- Multitasking & Task Prioritization

- Migrated Flutter projects to newer versions, configuring build flavors and managing dependencies.
- Forked and tailored third-party Flutter libraries to align with specific project requirements.
- Managed version control using GitHub and GitLab, handling branching, merging, and code reviews.
- Implemented `get_it` for dependency injection, improving code modularity and testability.
- Integrated media players (Chewie, Video Player, Better Player) with offline download capabilities.
- Developed e-commerce features including add-to-cart, wishlist, and real-time inventory updates.
- Designed responsive, accessible UI/UX with Figma, ensuring cross-device compatibility.
- Collaborated in Agile teams to deliver high-quality features on schedule.
- Managed multiple concurrent projects, prioritizing tasks to meet deadlines effectively.
- Continuously expanded expertise by adopting new technologies and contributing to open-source Flutter projects.

YAJ Tech Pvt. Ltd. | kathmandu — Flutter Developer (Internship)

Jul 2022 -Jan 2023

- Developed real-time chat applications using Firebase Realtime Database and Firebase Authentication with Flutter BLoC for efficient state management.
- Built responsive, real-time features, managing live data streams for seamless user experiences.
- Implemented push notifications using Firebase Cloud Messaging and Flutter Local Notifications for consistent user engagement.
- Configured and debugged notification systems to ensure reliable delivery and performance.
- Designed secure email and phone-based authentication systems with Firebase Authentication, adhering to security best practices.
- Managed user sessions, implementing robust authentication flows and token management.
- Integrated and maintained RESTful APIs using Dio and HTTP, ensuring efficient data retrieval and error handling.
- Optimized API requests with caching and retry logic, resolving connectivity issues for improved reliability.

- Teamwork & Collaboration
- Adaptability & Flexibility
- Linux OS
- Library Customization

TOOLS

- VS Code
- Android Studio
- IntelliJ IDEA
- Xcode
- Figma
- Postman
- HTTP Toolkit
- Flutter DevTools
- Widget Inspector
- GitHub
- GitLab
- ClickUp
- Trello
- Firebase
- Firebase Crashlytics
- GitHub Copilot
- JDK
- Gradle
- Vysor

- Identified and fixed technical bugs, enhancing application stability and performance.
- Strengthened problem-solving and analytical skills by addressing complex technical challenges.
- Mastered Flutter fundamentals and BLoC pattern for scalable state management.
- Gained expertise in integrating and managing Firebase services (Authentication, Realtime Database, Cloud Messaging).
- Developed cross-functional skills, collaborating effectively in team-based development workflows.
- Utilized Git for version control, managing codebases and contributing to team repositories.

EDUCATION

Nihareeka College of Management and IT (TU), Biratnagar
 — *BSc CSIT (Bachelor of Science in Computer Science and Information Technology)*

2017 Batch

PROJECTS

Ambition Guru — *Learning Platform*

- Collaborated on Ambition Guru App, an educational platform, launching it on Play Store and App Store over 2 years.
- Developed real-time chat with WebSocket and integrated video/audio players for enhanced user engagement.
- Implemented Hive caching for offline access and optimized BLoC state management to reduce API calls and boost performance.
- Integrated e-Sewa and Khalti payment gateways, PDF/HTML rendering, and responsive UI/UX using Figma designs.
- Maintained clean code with Dart mixins, services, and extensions, separating UI/logic for scalability.
- Customized Kotlin plugins via Dart-to-Kotlin channels and tailored multiple Flutter libraries to meet project-specific logic and UI requirements.
- Applied ProGuard for security, managed Gradle migrations, and used Git for version control in Agile team workflows.

Nagarik App — *Government Service Provider*

- Collaborated on Nagarik App, a government service platform,

launching it on Play Store and App Store.

- Developed robust API integrations using Dio for seamless data retrieval and real-time updates.
- Implemented Firebase Cloud Messaging for push notifications, enhancing user engagement with timely alerts.
- Established caching mechanisms for offline access, ensuring reliable service availability without connectivity.
- Translated complex Figma designs into intuitive, responsive UI/UX for improved user experience.
- Managed Flutter version migrations, resolved deprecated methods, and maintained app stability.
- Integrated Connect-IPS and Khalti payment gateways, streamlining secure transactions and fixing reliability issues.
